

Elevate your procurement process with the Rapid Global and Unimarket integration

With the integration between Unimarket's (formerly VendorPanel) Go to Market and Rapid Global's Contractor Management modules, users can seamlessly identify compliant suppliers, enhancing procurement, compliance, and risk management for organisations across all industries.

Rapid & Unimarket Integration

What is Unimarket?

Unimarket is an award-winning provider of source-to-pay solutions trusted by hundreds of government, education, healthcare and corporate organisations, designed to simplify the entire procurement and contract lifecycle and drive best practice in managing decentralised spend.

Unimarket empowers teams to manage sourcing, purchasing and contracts seamlessly. Our platform connects buyers and suppliers in a secure, intuitive environment, enabling strategic insights, improved compliance, and greater efficiency from planning to payment.

Unimarket's Go to Market solution enables organisations to manage all quote-based sourcing, from simple RFP to complex tenders. It offers an intuitive, transparent, and standardised process for managing supplier discovery, evaluations, award, and audit-ready reporting.

Why integrate Rapid Global and Unimarket?

By combining Unimarket's procurement capabilities with Rapid's compliance tools, users can efficiently manage the entire vendor lifecycle while ensuring safety and compliance standards are met.

Key benefits:

Simplified vendor management:

The integration provides a centralised system for managing contractors and vendors, allowing businesses to easily monitor compliance and safety certifications. Unimarket users can source only from suppliers that meet Rapid's compliance requirements, reducing the administrative burden and improving vendor selection efficiency.

Enhanced compliance and risk mitigation:

The integration ensures that all suppliers meet required compliance standards before they are engaged in any project. Rapid's compliance tools automatically cross-check vendor documentation and certifications, flagging any non-compliant suppliers. This minimises the risk of project delays and non-compliance penalties.

Real-time compliance visibility:

With the integration, compliance data from Rapid is visible in real-time within Unimarket. Buyers can quickly identify compliant vendors using a traffic light system, making the vendor selection process more efficient and transparent.

Rapid & Unimarket Integration

Centralised reporting and documentation:

 The integration allows for the centralisation of vendor compliance documentation and reporting. This ensures that businesses can track, store, and audit vendor information, making it easier to meet regulatory requirements and streamline internal audit processes.

Improved efficiency in procurement and project delivery:

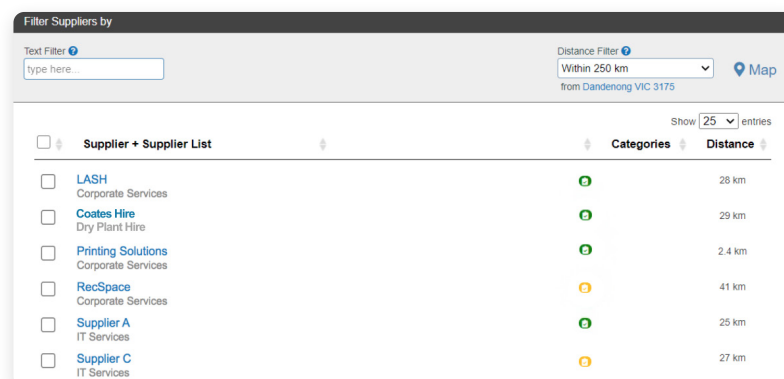

By automating compliance checks and ensuring that only compliant vendors are selected, businesses can improve project delivery times, reduce procurement delays, and ensure that all engaged vendors meet safety and regulatory requirements.

How does the integration work?

Through a standard plugin between the two platforms, verified compliance data is pulled from Rapid Contractor Management into Unimarket's Go to Market platform. When a supplier is registered on both platforms, their compliance status from Rapid will show against them in Go to Market.

A traffic light system will be visible against each supplier when viewing a list of vendors in the supplier discovery phase of the procurement process. This allows users and buyers to easily identify which suppliers are compliant (and non-compliant) at a critical stage in the procurement lifecycle.

Compliance status information will be added to the supplier profile, allowing users to view the status of the supplier and to access additional information in real-time, including status reason and approved supplier categories.

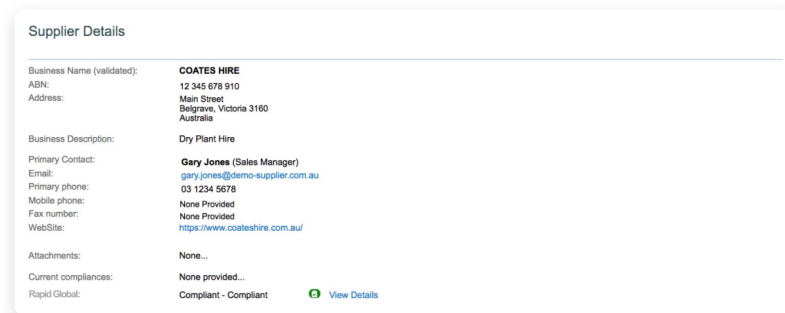

The screenshot shows a web interface titled "Filter Suppliers by". It includes a "Text Filter" input field with the placeholder "type here...", a "Distance Filter" dropdown menu set to "Within 250 km" (with a sub-note "from Dandenong VIC 3175"), and a "Map" icon. Below the filters, there is a table with columns for "Supplier + Supplier List", "Categories", and "Distance". The table lists six suppliers, each with a checkbox, a name, a sub-name, a compliance badge (green or orange), and a distance in km.

<input type="checkbox"/>	Supplier + Supplier List	Categories	Distance
<input type="checkbox"/>	LASH Corporate Services		28 km
<input type="checkbox"/>	Coates Hire Dry Plant Hire		29 km
<input type="checkbox"/>	Printing Solutions Corporate Services		2.4 km
<input type="checkbox"/>	RecSpace Corporate Services		41 km
<input type="checkbox"/>	Supplier A IT Services		25 km
<input type="checkbox"/>	Supplier C IT Services		27 km

Do suppliers need to be registered in both systems?

Yes, suppliers who are registered in the Rapid Contractor Management solution also need to be invited to register, or already registered, in Unimarket.

How long does implementation take?

Implementation of Rapid Contractor Management into Unimarket can be completed within a few hours. Contact our support team to get started
