

# Improve your key management

## with the Rapid and Master Lock integration

In the world of compliance and safety, being able to access and manage keys to a site is critical. Managing who can get to which areas, and when they can do it, is one of the core components of compliance management.

To this end, there are a range of key access management solutions to choose from, making it easier and more effective to take control.

# Rapid & Master Lock Integration

## What is Master Lock?

Master Lock provides robust personal and commercial access management solutions world-wide. With user-friendly resources and custom-made solutions, it equips businesses with precise control over their security infrastructure.

## Why integrate Rapid and Master Lock?

Rapid, as a state-of-the-art compliance management system, enhances Master Lock's access management system with compliance checks, ensuring operational efficiency and superior security standards. The combined system ensures flexible and cost-effective management of unmanned sites.

### Key benefits:

Use your mobile phone to access the Rapid Access app (available via Google Play and Apple app store), verify compliance, unlock and access keys.

Great for unmanned sites that you need to give controlled access to compliant contractors.

Use Bluetooth technology or generate a code, for even greater security based on physical location of the contractors logged in device.

Range of locks available, including electronic padlocks and lock boxes

## How does the integration work?

Contractors can use the Rapid Access smartphone app to simplify key handovers. Master Lock's system, integrated with Rapid, validates all access requests for compliance before granting permissions either by providing a code or using Bluetooth connectivity to open the lock. The solution is adaptable, covering everything from traditional padlock solutions to technologically advanced Bluetooth enabled hardware.

## How long does implementation take?

Configuring the Master Lock integration is exceptionally easy and quick. Clients can source hardware via Rapid or a third-party supplier. Contact our support team to get started.
