

Revolutionise key management in your workplace

Integrate Rapid Access visitor management software with KeyWatcher Australia's electronic key management system.

Enhance security of your sites and your assets

Empower your administrators and managers with greater control over who has access to your sites, as well as your assets, by integrating Rapid Access with KeyWatcher.

Remote key management	Grant access to keys from anywhere 24/7, which is ideal for organisations with multiple sites, facilities and assets.
Tailored configuration	Access a range of settings within the Rapid Access dashboard such as enabling remote access requests to fast-track the check-in process when personnel arrive on site.
Automated reporting	Keep your site and management personnel informed with automated reporting. Instantly receive data on who accessed the key and status -in/out of the cabinet.
Instant notifications	Receive notifications when a key has not been returned by a specific time. Set up notifications to send to specific personnel either by role or site.
Emergency response	Release keys quickly and efficiently during a fire or flood emergency. Relocate machinery or vehicles to a safe site or restrict key access to prevent personnel entering the facility during an emergency evacuation.
Safety alerts	Display safety alerts for specific sites, companies, or individuals for a specified time.

Boost compliance with a fully integrated system

From the moment your employees and contractors arrive on site, Rapid's native integrations work seamlessly together to ensure only compliant personnel are granted access to your workplace and your keys.

Contractor and supplier management	Ensure contractors and suppliers entering your sites are fully compliant with valid licences and documentation with Rapid Contractor Management.
Induction training	Check that your site employees, contractors, and site visitors have the relevant qualifications and up to date inductions before gaining access to your workplace with Rapid Induct.
Issue work permits	Ensure that only authorised people are able to carry out high-risk work on your site with Rapid Permit To Work.

Fully integrated modular workforce management software.

System requirements

Rapid Access supports KeyWatcher Australia's KeyWatcher Illuminated cabinets and KeyWatcher Touch cabinets.

Communication

The Rapid Visitor Access Application and KeyWatcher's Electronic Key Cabinet operate as cloud-based systems. Their respective cloud environments communicate through secured API endpoints to ensure seamless integration and robust security.

User management

Use Rapid to manage all users in KeyWatcher. This makes it ideal for customers to maintain a single source of truth for all contractor.

Data security

Advanced security policies are applied in the integration between Rapid and KeyWatcher to ensure end-to-end data protection.

Software

The KeyWatcher Illuminated model must be managed by either KeyPro III or KeyMaas software. KeyWatcher Touch model must be managed by either TrueTouch or KeyMaas software.

Increase data privacy and security

Protecting your company's information is our highest priority. Rapid's information systems are ISO 27001 certified which demonstrates our commitment to industry standard protocols to safeguard your sensitive information.

ISO 27001 certified datacentres

Our data centres are committed to meeting the highest standards of information security and are ISO 27001 certified.

Two-factor authentication

NEW

Powered by Google Authenticator app, two-factor verification (2FA) provides an additional layer of protection, helping to secure your account against password breaches, keylogging, and other cybersecurity threats.
