

# RapidAccess + Torus

## Revolutionise key management in your workplace

Integrate Rapid Access visitor management software with Torus, a secure and automated key management system.

## Enhance security of your sites and your assets

Empower your administrators and managers with greater control over who has access to your sites, as well as your assets by integrating Rapid Access with Torus.

|                               |                                                                                                                                                                                                                        |
|-------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Remote key management</b>  | Grant access to keys from anywhere 24/7, which is ideal for organisations with multiple sites, facilities and assets.                                                                                                  |
| <b>Tailored configuration</b> | Access a range of settings within Rapid Access dashboard such as enabling remote access requests to fast-track the check-in process when personnel arrive on site.                                                     |
| <b>Automated reporting</b>    | Keep your site and management personnel informed with automated reporting. Instantly receive data on who accessed the key and status -in/out of the cabinet.                                                           |
| <b>Instant notifications</b>  | Receive notifications when a key has not been returned by a specific time, set up notifications to send to specific personnel either by role or site.                                                                  |
| <b>Emergency response</b>     | Release keys quickly and efficiently during a fire or flood emergency. Relocate machinery or vehicles to a safe site or restrict key access to prevent personnel entering the facility during an emergency evacuation. |
| <b>Safety alerts</b>          | Display safety alerts for specific sites, companies, or individuals for a specified time.                                                                                                                              |

## Boost compliance with a fully integrated system

From the moment your employees and contractors arrive on site, Rapid's native integrations work seamlessly together to ensure only compliant personnel are granted access to your workplace and your keys.

|                                           |                                                                                                                                                                                      |
|-------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Contractor and supplier management</b> | Ensure contractors and suppliers entering your sites are fully compliant with valid licenses and documentation with Rapid Contractor Management.                                     |
| <b>Induction training</b>                 | Check that your site employees, contractors, and site visitors have the relevant qualifications and up to date inductions before gaining access to your workplace with Rapid Induct. |
| <b>Issue work permits</b>                 | Ensure that only authorised people are able to carry out high-risk work on your site with Rapid Permit To Work.                                                                      |

Fully integrated modular workforce management software.

## System requirements

Torus is a complete IoT solution for key management. Torus is built using the Microsoft Azure technology stack with embedded Linux device firmware. Torus cabinets can be managed from any computer over secure internet, with no software installation required.

---

### Communication

The integration is between Rapid and Torus' software so there are no connections that need to be made to your local network.

---

### User management

Use Rapid to manage all users in Torus, making it ideal for customers to maintain a single source of truth for all contractors.

---

### Data security

Advanced security policies are applied in the integration between Rapid and Torus to ensure end-to-end data protection.

## Increase data privacy and security

Protecting your company's information is our highest priority. Rapid's information systems are ISO 27001 certified which demonstrates our commitment to industry standard protocols to safeguard your sensitive information.

---

### ISO 27001 certified datacentres

Our data centres are committed to meeting the highest standards of information security and are ISO 27001 certified.

---

### Two-factor authentication

NEW

Powered by Google Authenticator app, two-factor verification (2FA) provides an additional layer of protection, helping to secure your account against password breaches, keylogging, and other cybersecurity threats.
